

## Seed to Seal: Quality Commitment

Young Living is proud to set the standard for essential oil purity and authenticity by carefully monitoring the production of their oils through their unique Seed to Seal® process. From the time the seed is sourced until the oil is sealed in the bottle, Young Living applies the most rigorous quality controls possible to ensure that you are receiving essential oils exactly the way nature intended.

Young Living's exclusive Seed to Seal process includes five painstaking steps:

**Seed:** Powerful, effective essential oils come from seeds and plants that are verified for their potential to produce high-quality essential oils.

**Cultivate:** Young Living farms, located around the globe, are dedicated to perfecting their responsible and sustainable growing and harvesting methods.

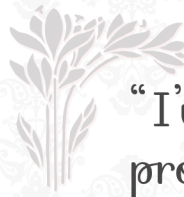

**Distill:** Combining ancient and modern techniques, Young Living is recognized as an innovator in essential oil distillation. Young Living uses cold pressing and resin tapping methods for select oils.

**Test:** Young Living never accepts diluted, cut, or adulterated oils. To guarantee consistent, verifiable quality, their oils are tested in Young Living's own internal labs, as well as in third-party facilities.

**Seal:** Young Living completes the Seed to Seal process in its 107,000 square-foot facility in Spanish Fork, Utah. Using state-of-the-art equipment, each essential oil is carefully bottled and labeled. Their carefully bottled, painstakingly produced essential oils are shipped to members worldwide.
